Check the appropriate box below if the Form 8-K filing is intended to simultaneously satisfy the filing obligation of the registrant under any of the following provisions (see General Instruction A.2. below):

☐ Written communications pursuant to Rule 425 under the Securities Act (17 CFR 230.425)

☐ Soliciting material pursuant to Rule 14a-12 under the Exchange Act (17 CFR 240.14a-12)

☐ Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b))

☐ Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Item 7.01 Regulation FD Disclosure.

On November 30, 2010, David N. Weidman, chairman and chief executive officer of Celanese Corporation (the "Company"), will address attendees of the Citi Basic Materials Symposium in New York. The slideshow presentation that will accompany the remarks made by Mr. Weidman and other investor relations professionals of the Company, during the conference and at other investor sessions, is being furnished to the Securities and Exchange Commission and is attached hereto as Exhibit 99.1 and is incorporated herein solely for purposes of this Item 7.01 disclosure. A webcast of the presentation and a replay of the webcast will be available on the Company's website at www.celanese.com under Investor/Presentations & Webcasts.

The information set forth in this Item 7.01, as well as statements made by representatives of the Company during the course of the presentation, includes "forward-looking statements". All statements, other than statements of historical facts, included in this Item 7.01, the attached Exhibit 99.1, or made during the course of the presentation, that address activities, events or developments that the Company expects, believes or anticipates will or may occur in the future are forward-looking statements.

Item 9.01 Financial Statements and Exhibits.

(d) *Exhibits*

Exhibit Number	Description
99.1	Slide Presentation related to the presentation to be given by Celanese Corporation at the Citi Basic Materials Symposium on November 30, 2010 in New York*

* In connection with the disclosure set forth in Item 7.01, the information in this Current Report, including the exhibits attached hereto, is being furnished and shall not be deemed "filed" for purposes of Section 18 of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), or otherwise subject to the liabilities of such section. The information in this Current Report, including the exhibits, shall not be incorporated by reference into any filing under the Securities Act of 1933, as amended, or the Exchange Act, regardless of any incorporation by reference language in any such filing. This Current Report will not be deemed an admission as to the materiality of any information in this Current Report that is required to be disclosed solely by Regulation FD.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.

CELANESE CORPORATION

Celanese Corporation

November 2010

Forward-Looking Statements

This presentation may contain “forward-looking statements,” which include information concerning the company’s plans, objectives, goals, strategies, future revenues or performance, capital expenditures, financing needs and other information that is not historical information. When used in this presentation, the words “outlook,” “forecast,” “estimates,” “expects,” “anticipates,” “projects,” “plans,” “intends,” “believes,” and variations of such words or similar expressions are intended to identify forward-looking statements. All forward-looking statements are based upon current expectations and beliefs and various assumptions. There can be no assurance that the company will realize these expectations or that these beliefs will prove correct.

There are a number of risks and uncertainties that could cause actual results to differ materially from the results expressed or implied in the forward-looking statements contained in this presentation. These risks and uncertainties include, among other things: changes in general economic, business, political and regulatory conditions in the countries or regions in which we operate; the length and depth of business cycles, particularly in the automotive, electrical, electronics and construction industries; changes in the price and availability of raw materials; the ability to pass increases in raw material prices on to customers or otherwise improve margins through price increases; the ability to maintain plant utilization rates and to implement planned capacity additions and expansions; the ability to improve productivity by implementing technological improvements to existing plants; increased price competition and the introduction of competing products by other companies; changes in the degree of intellectual property and other legal protection afforded to our products; compliance costs and potential disruption of production due to accidents or other unforeseen events or delays in construction of facilities; potential liability for remedial actions and increased costs under existing or future environmental regulations, including those relating to climate change; potential liability resulting from pending or future litigation, or from changes in the laws, regulations or policies of governments or other governmental activities in the countries in which we operate; changes in currency exchange rates and interest rates; and various other factors discussed from time to time in the company’s filings with the Securities and Exchange Commission. Any forward-looking statement speaks only as of the date on which it is made, and the company undertakes no obligation to update any forward-looking statements to reflect events or circumstances after the date on which it is made or to reflect the occurrence of anticipated or unanticipated events or circumstances.

Results Unaudited

The results in this presentation, together with the adjustments made to present the results on a comparable basis, have not been audited and are based on internal financial data furnished to management. Quarterly and LTM results should not be taken as an indication of the results of operations to be reported for any subsequent period or for the full fiscal year.

Use of Non-U.S. GAAP Financial Information

This presentation includes the following non-U.S. GAAP financial measures: operating EBITDA, net debt, proportional share EBITDA and net debt, and adjusted earnings per share. These measurements are not recognized in accordance with U.S. GAAP and should not be viewed as an alternative to U.S. GAAP measures of performance. The most directly comparable financial measure presented in accordance with U.S. GAAP in our consolidated financial statements for operating EBITDA is net income; for proportional share EBITDA is equity in net earnings of affiliates; for net debt or proportional share net debt is total debt; and for adjusted earnings per share is earnings per common share-diluted. Reconciliations of these non-U.S. GAAP financial measures are included in the Appendix.

Operating EBITDA *, a measure used by management to measure performance, is defined by the company as net earnings plus loss from discontinued operations, interest expense, taxes, and depreciation and amortization, and further adjusted for Other Charges and Adjustments as described in Slide 31. We may provide guidance on operating EBITDA and are unable to reconcile forecasted operating EBITDA to a U.S. GAAP financial measure because a forecast of Other Charges and Adjustments is not practical.*

Net debt *is defined by the company as total debt less cash and cash equivalents.*

Proportional EBITDA *of Affiliates is defined by the company as proportional operating profit plus the proportional depreciation and amortization of its equity investments.*

Proportional Net Debt *of Affiliates is defined by the company as our proportional share of our affiliates' net debt.*

Adjusted earnings per share *is defined by the company as net earnings (loss) available to common shareholders plus preferred dividends, adjusted for Other Charges and Adjustments as described in Slide 31, and divided by the number of basic common shares, diluted preferred shares, and options valued using the treasury method. We may provide guidance on an adjusted earnings per share basis and are unable to reconcile forecasted adjusted earnings per share to a U.S. GAAP financial measure without unreasonable effort because a forecast of Other Items is not practical. Note: The tax rate used for adjusted earnings per share approximates the midpoint in a range of forecasted tax rates for the year, excluding changes in uncertain tax positions, discrete items and other material items adjusted out of our U.S. GAAP earnings for adjusted earnings per share purposes, and changes in management's assessments regarding the ability to realize deferred tax assets. We analyze this rate quarterly and adjust if there is a material change in the range of forecasted tax rates; an updated forecast would not necessarily result in a change to our tax rate used for adjusted earnings per share. The adjusted tax rate is an estimate and may differ significantly from the tax rate used for U.S. GAAP reporting in any given reporting period. It is not practical to reconcile our prospective adjusted tax rate to the actual U.S. GAAP tax rate in any future period.*

Celanese technology-focused portfolio - building on a track record of execution and value creation

Celanese

Celanese
($ in millions)

LTM 9/30/2010 Revenue:	$5,799
LTM 9/30/2010 Operating EBITDA:	$1,088

Value creation levers drive increased earnings

Celanese

Geographic Growth

- Emerging-region leadership drives accelerated growth
- Participation in > GDP growth industries in developed economies supports enhanced position

Innovation

- Value-added products drive margin expansion
- Access to new application space supports accelerated growth

Productivity

- Deliver cost improvements 2x fixed cost inflation
- Track record of execution
- Strengthens operating leverage

Portfolio

- Create shareholder value through synergistic acquisition
- Portfolio transformation reducing earnings volatility

Increasing the earnings power of the portfolio to $1.6 - $1.8 billion

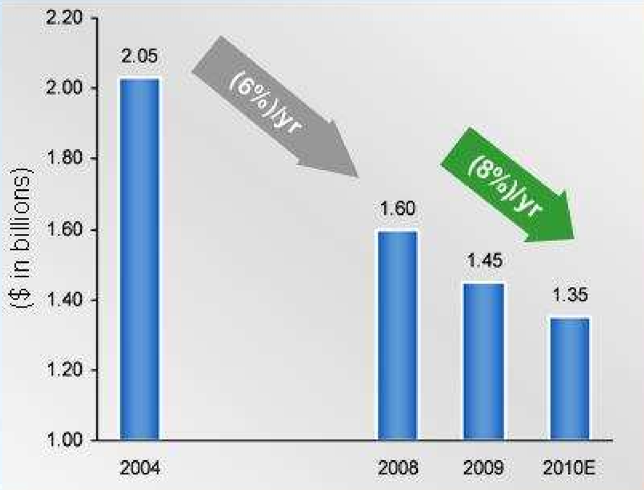
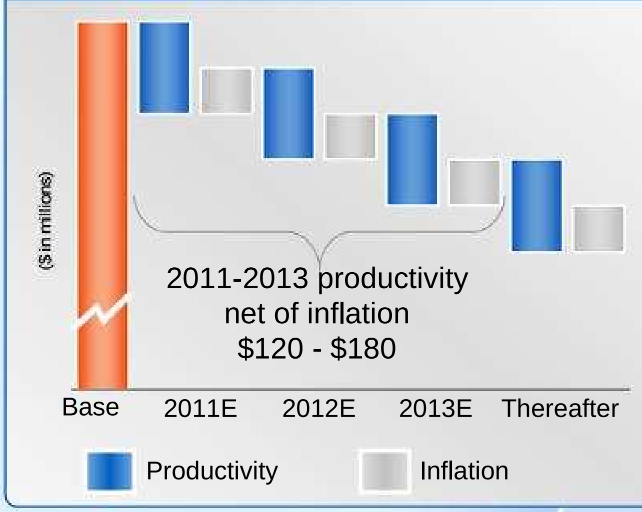
Consistently delivering productivity over fixed cost inflation

Fixed Costs [1]



Spending [2]



- ► Process technology improvements
  - Catalyst / yield
  - Digitization
- ► Energy reduction
  - Multi-year initiative
  - Critical to meeting sustainability goals
- ► Strategic programs
  - Raw materials
- ► Business process excellence
  - Six Sigma
  - Lean manufacturing

1) Fixed costs exclude energy, fixed distribution and depreciation; FX adjusted; 2004 is pro forma of current portfolio based on Celanese management estimates
2) Assumes stable currency and raw material pricing

Value creation levers drive increased earnings

Celanese

Geographic Growth

- Emerging-region leadership drives accelerated growth
- Participation in > GDP growth industries in developed economies supports enhanced position

Innovation

- Value-added products drive margin expansion
- Access to new application space supports accelerated growth

Productivity

- Deliver cost improvements 2x fixed cost inflation
- Track record of execution
- Strengthens operating leverage

Portfolio

- Create shareholder value through synergistic acquisition
- Portfolio transformation reducing earnings volatility

Increasing the earnings power of the portfolio to $1.6 - $1.8 billion

Recent portfolio enhancements build on advantaged specialty materials

Celanese

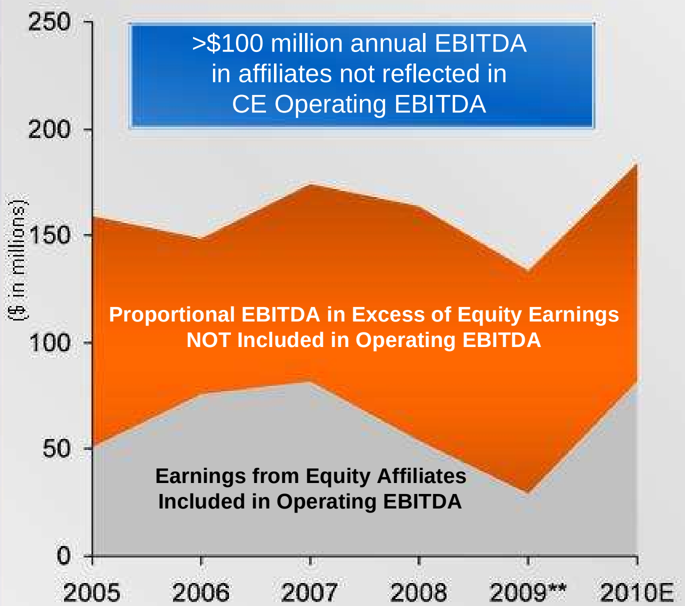
Advanced Engineered Materials

FACT LFT Acquisition	Ibn Sina POM Expansion	DuPont LCP and PCT Acquisition
► Expands customer/application space ► Enables manufacturing footprint optimization ► Adds technology capabilities	► Extends current relationship and advantaged raw material position ► Increases economic participation ► Supports future growth	► Builds on leading technology platform ► Increases presence in high growth regions ► Provides access to new customers and application space

Increasing the earnings power of the business through effective cash deployment

Economic value of our strategic affiliates

Earnings and Proportional EBITDA of Affiliates*



Cash from Strategic Affiliates

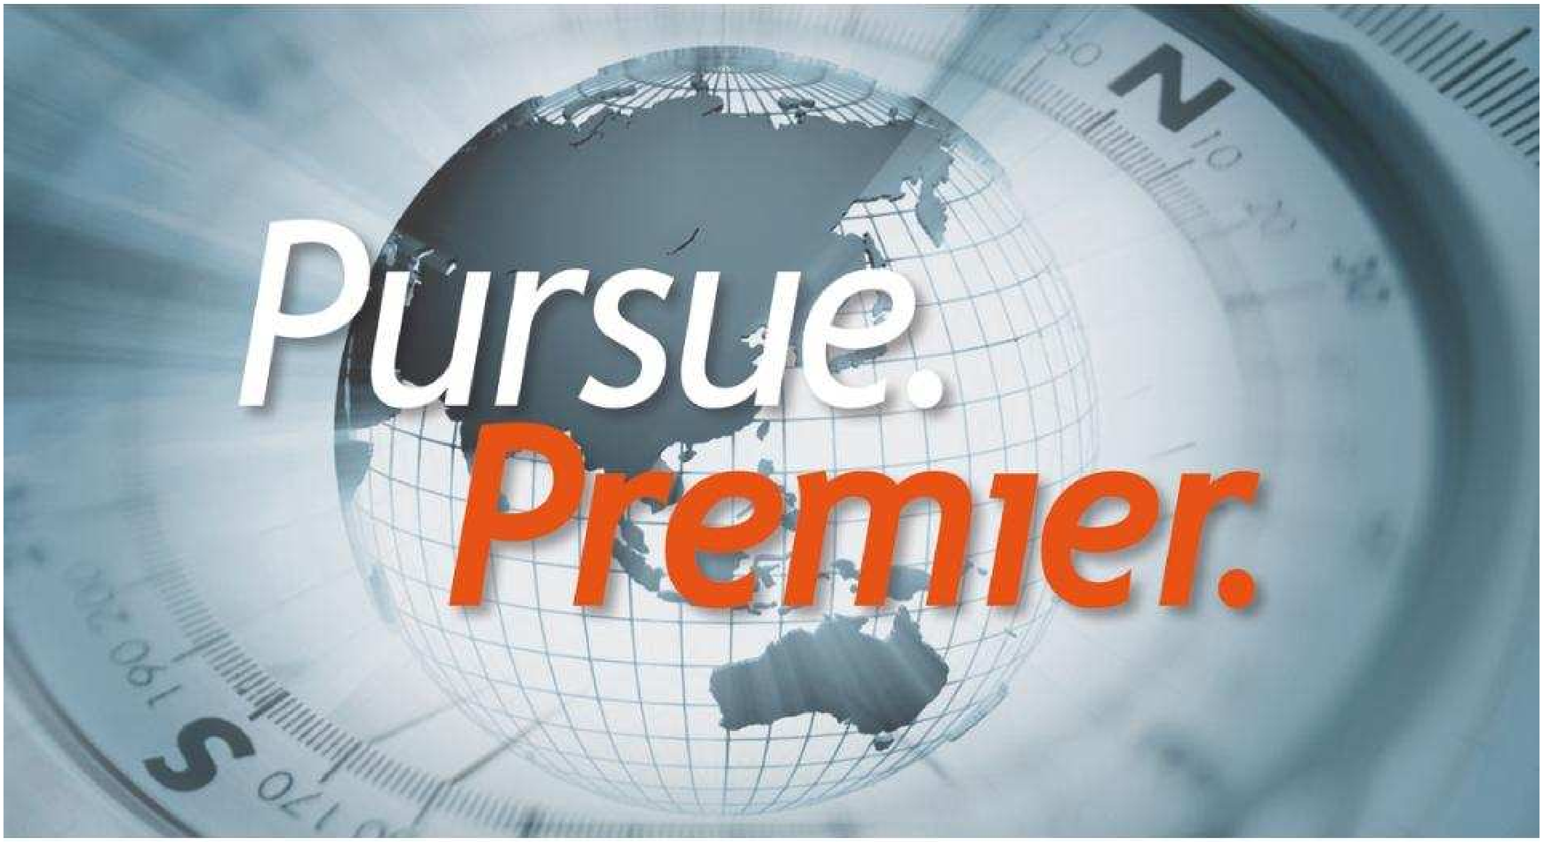
Significant earnings AND cash contributions

* Due to lack of historical data, this table excludes the results of Ibn Sina as an equity investment.
** Excludes a one-time tax adjustment of $19 million.

Celanese growth opportunities represent an attractive investment for shareholders

Celanese

Leading portfolio with strategic affiliates	► Technology-focused; specialty materials ► Strategic affiliates: Add to attractive portfolio
Strong earnings growth	► Significant mid-term earnings growth opportunities ► Celanese-specific value growth levers
Significant value opportunity for investors	► Increasingly confident in strategic objective of \$1.6 to \$1.8 billion mid-term operating EBITDA ► Cash deployment opportunities add to value creation



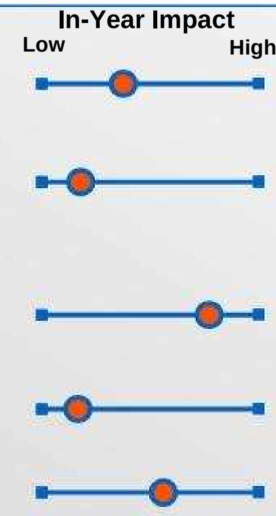
Celanese Corporation

APPENDIX

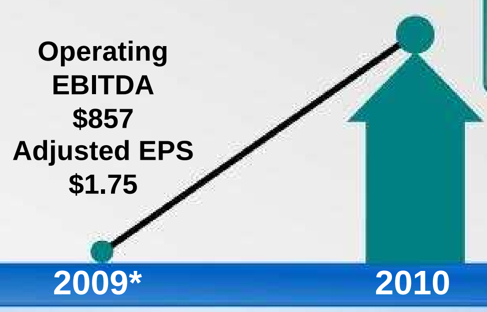
Confident in short-term earnings growth

Celanese

Geographic Growth	• Continued strength in emerging economies • Nanjing expansion supports further growth	
Innovation	• Commercialization of new Ticona polymer technology • Emulsions low VOC products	
Productivity	• Manufacturing optimization • Energy reduction • SG&A process improvements	
Portfolio	• Acquired FACT's LFT business • Acquired DuPont's LCP/PCT businesses	
Economic Growth	• Economic recovery off low 2009 base • Accelerated pace of recovery in 2010	



YOY Improvement
+>$260 million operating EBITDA
+>$1.51 Adjusted EPS

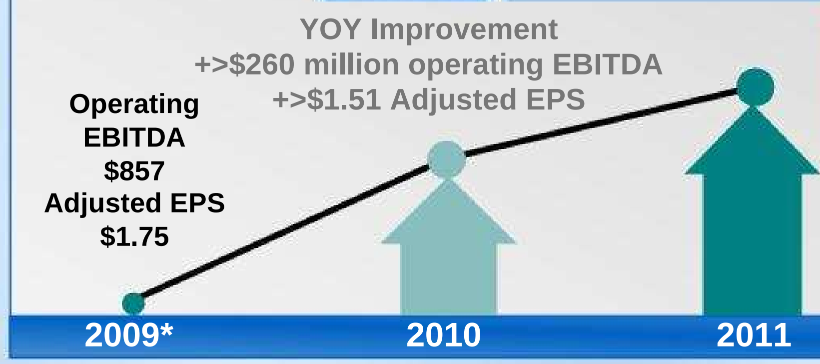


* Adjusted to reflect the change in accounting method for Ibn Sina

Confident in short-term earnings growth

Celanese

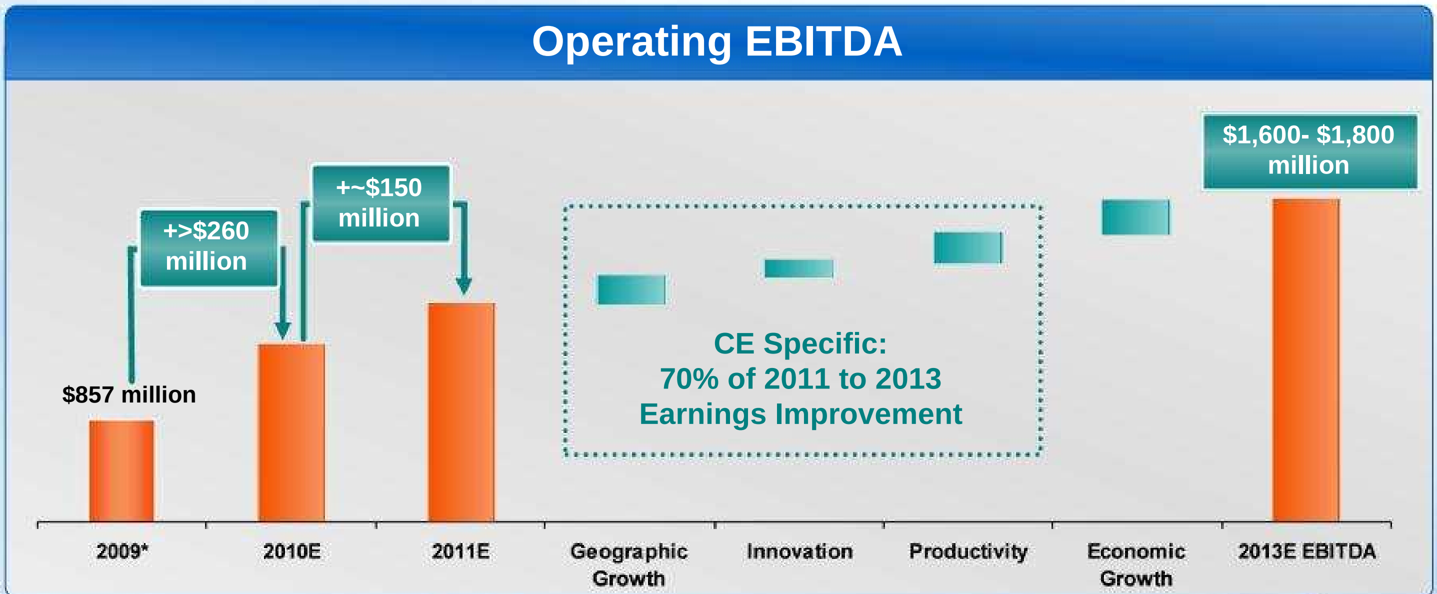
		In-Year Impact (Low – High)
Geographic Growth	• Continued growth in emerging economies • New VAE unit in China	
Innovation	• IS and AEM innovation pipeline • AI process innovation	
Productivity	• Further manufacturing optimization • Energy reduction	
Portfolio	• Acquisition synergies • Additional deployment of cash	
Economic Growth	• Continue gradual economic recovery	



YOY Improvement
+ ~$150 million operating EBITDA
+ ~$0.60 Adjusted EPS

* Adjusted to reflect the change in accounting method for Ibn Sina

Earnings power of advantaged portfolio



Accelerated topline growth

Improved earnings power

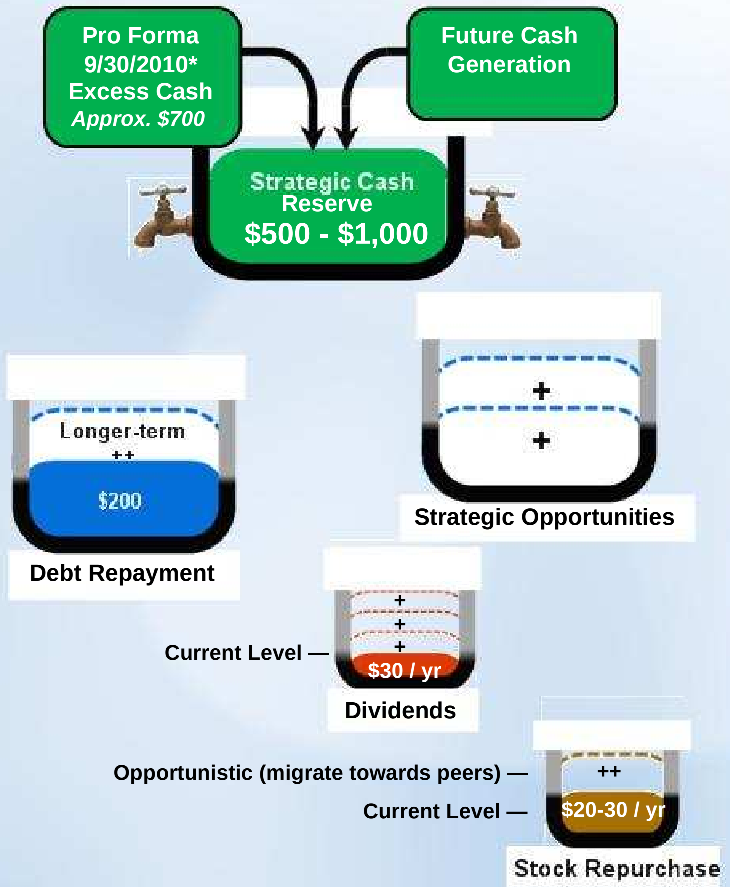
Continued generation & deployment of cash

Multiple strategic levers accelerate earnings growth

* Adjusted to reflect the change in accounting method for Ibn Sina; includes Other Activities segment

Strategic uses of cash

($ in Millions)



Comments

- Priority use of cash - strategic growth opportunities, M&A, and strategic reserve replenishment
- Debt paydown next largest use of cash
- Modest annual increases in dividends
- Flexible use of cash for opportunistic share repurchase
  - Share repurchase offsetting equity compensation dilution
  - Move towards industry norm

* Ending cash on 9/30/2010 of $884 million less $100-$200 million of operating cash.

Debt maturities and interest cost

Celanese

Before Transaction

After Transaction

Benefits

- Staggered maturities
- Maintained revolver availability
- Maintained flexibility

Net Interest Cost

Impact on Interest Cost

- Minimal effect in 2010
- Net interest in 2011 approximately $225 million
- Significant decrease in 2012 as fixed LIBOR declines sharply

Note: Does not reflect maturities of capital leases, industrial revenue bonds, other bank obligations, or affiliate borrowings. Excludes impact of amortization of deferred financing costs.
LIBOR assumptions for 2010 [0.46%], 2011 [0.64%], and 2012 [1.27%]
